

The ViviSat Satellite Servicing Mission Extension Vehicle (MEV)
For Satellite Servicing

On 26 October 2015, the Commercial Remote Sensing Regulatory Affairs Office of the National Oceanic and Atmospheric Administration, an agency of the Department of Commerce, granted a license to ViviSat LLC to operate a private, commercial, space-based, remote sensing system of up to ten Mission Extension Vehicle (MEV) satellites to collect images of client satellites during rendezvous and docking operations. The MEV rendezvous and docking operations will be conducted in a nominal 42,000 km circular geosynchronous orbit, with inclinations between 0 and 28.5 degrees for the purpose of life extension and servicing of the client satellites.
